Model

SignUpClient

String firstName, lastName, psw1, psw2, address, city, province, country Integer zipCode, mobilePhone, workPhone

- -public SignUpClient()
- -public void setValues()
- -public void sendInput()
- -public void showPage()
- -public void signUpButton()
- -public void cancelButton()

UserSettings

String firstName, lastName, psw1, psw2, address, city, province, country, email Integer zipCode, mobilePhone, workPhone

- -public UserSettings()
- -public void setValues()
- -public void sendInput()
- -public void showPage()
- -public void saveButton()
- -public void cancelButton()

UserManagement

String name, email

- -public UserManagement()
- -public void setValues()
- -public void sendInput()
- -public void showPage()
 -public void deleteButton()
- String email, psw

-public LogIn()

- -public void sendInput()
- -public void showPage()
- -public void loginButton()

BussinessSearch

String search, range, product, container, trasportation

- -public BussinessSearch()
- -public void setValues()
- -public void sendInput()
- -public void showPage()
- -public void searchButton()

Product

Login

String name, address, city, province, country, email Integer zipCode, phone

-public Product()

-public void setValues()

-public void showProduct()

-public void bookButton()

ShowProducts

String service

Boolean doorToDoor, warehouse List<Product> products

- -public ShowProducts()
- -public void sendInput()
- -public void showPage()

Meeting

String product, currency, email Double price

-public Meeting()

-public setValues()

-public void sendInput()

-public void showPage()

-public void sendEmailButton()

-public void cancelButton()

BussinessABM

Boolean national, international, importation, exportation, doorToDoor, deliverAtT, deliverAtD,

transportDanerous, loadingServices, customsManagement,

preCustomsInspection, trackingServices, localControlAgencies, insurance, fcl, lcl, air, sea, ground, small, medium, large, oversized
